	• POWER STEERING	<input checked="" type="checkbox"/>
	• DUAL AIRBAGS	<input checked="" type="checkbox"/>

The best roof top tent creates extra space inside your vehicle. Think about how much room is taken up with traditional tents and bedding... and think what you could do with that extra space? It may mean being able to take an extra person on your next trip. While your friends are dealing with the ropes, pegs and poles of traditional tents, your James Baroud rooftop tent is open and ready to use in less than 10 seconds. It just doesn't get any easier. Sleeping elevated away from rough ground on a comfortable foam mattress, screened from biting insects and unwanted pests, your cosy sleeping space is thoroughly waterproof, wind tested to 120 KM/hour and well ventilated. Fantastic for a weekend away fishing, surfing safari or an extended touring holiday.
